Maximum Marks	5Marks

Project Proposal (Proposed Solution) report

The proposal aims to develop a Salesforce-based Cricket Player Performance Tracking Application to store player details and match-wise performance records in one organized system. It helps reduce manual data entry, simplify performance tracking, and provide useful reports and dashboards.

Project Overview	
Objective	To create a Salesforce-based system for managing cricket player information and match performance, with easier tracking, comparison, reporting, and analysis.
Scope	The project covers Player and Match Performance objects, relationships, fields, Salesforce Flows, roll-up summaries, reports, and dashboards.
Problem Statement	
Description	Cricket player and match statistics can become scattered across different records. Manual data entry makes it difficult to maintain, compare, and analyze player performance.
Impact	The system provides centralized data storage, reduces repetitive manual work, and makes player performance easier to review and compare.
Proposed Solution	
Approach	Develop CRICKSTATS using Salesforce to store player and match information, connect related records, automate calculations, and display performance through reports and dashboards.
Key Features	CRICKSTATS centralizes player data, tracks match performance, and automates summaries using Salesforce Flow, reports, dashboards, and roll-up fields.

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	Standard computer with internet connection.	Computer/Laptop with internet connection
Memory	Minimum 4 GB RAM.	8 GB
Storage	Cloud-based Salesforce storage for player and match records.	Salesforce Cloud Storage
Software		
Frameworks	Salesforce Lightning Platform.	Salesforce Lightning
Libraries	Not specified	Not specified
Development Environment	Salesforce Developer Org / Salesforce Setup.	Salesforce Developer Org / Salesforce Setup
Data	Player details and match-wise performance re	Player details and match-wise performance records
