

Code-Layout, Readability and Reusability

Date	29-09-2026
Team ID	SWTID-2026-3226
Project Name	CRICKSTATS
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	YES	Salesforce configuration and project components are <u>organized consistently</u> .
2	Proper File Structure	Files and folders are logically organized	YES	The project is organized into Player, Match Performance, Flows, Reports and Dashboards
3	Meaningful Variable Names	Variables reflect their purpose clearly	YES	Names such as Player, Team, Match Performance, Player_info and Player_Flow are <u>meaningful</u>
4	Function / Method Names	Functions are descriptively named	YES	Flow and resource names clearly indicate their purpose
5	Code Comments	Inline and block comments explain logic	Partial	The documentation provides step-by-step explanations, but source-code comments are not explicitly shown
6	Modular Design	Code is split into reusable functions/modules	YES	The application separates objects, fields, relationships, flows and reporting components
7	No Redundant Code	Duplicate or unused code is removed	Partial	The documentation focuses on avoiding duplicate manual data entry; source-code redundancy is not directly demonstrated
8	Error Handling	Exceptions and errors are handled gracefully	YES	Validation rules, field checks and error-handling requirements are <u>included in the project design</u> .

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	Player Object	Salesforce Custom Object	Player information management	High

2	Match Performance Object	Salesforce Custom Object	Match-wise performance tracking	High
3	Player–Match Relationship	Salesforce Relationship	Connecting player and match data	High
4	Roll-up Summary Fields	Salesforce Configuration	Calculating player performance totals	High
5	Player Flow	Salesforce Flow	Team-based player filtering	High

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	5	The project components are logically organized into objects, fields, relationships, flows and reports
Readability	5	Meaningful labels, clear field names and structured documentation make the project easy to understand
Reusability	5	Custom objects, relationships, flows, roll-up summaries and reports can be reused for additional players and matches
Documentation / Comments	4	The project contains detailed implementation steps; source-code comments are not explicitly demonstrated
Overall Score	5 / 5	CRICKSTATS demonstrates a well-structured, readable and reusable Salesforce-based application.
