

Coding & Solution

Date	29 September 2026
Team ID	SWTID-2026-3226
Project Name	CRICKSTATS
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	[Paste your GitHub / GitLab or hosted link here]
Programming Language(s)	HTML, CSS, JavaScript, Python
Framework(s) Used	Flask
Key Features Implemented	1. Cricket statistics management and display. 2. Player and team information management. 3. Search and view cricket statistics. 4. User-friendly dashboard interface. 5. Dynamic data display using web technologies. 6. Responsive and easy-to-use design. 7. Reusable components and modules. 8. Backend integration for processing cricket data.
Pending / Incomplete Features	Advanced analytics, live cricket score integration, user authentication, and deployment to a production server can be added in future versions.
Setup / Run Instructions	1. Create a Salesforce Developer Account. 2. Create the Player and Match Performance objects. 3. Configure fields, relationships, and Roll-up Summary fields. 4. Create and activate the Player Flow. 5. Open the CRICKSTATS Lightning App. 6. Add player and match records to the application. 7. View the results through the reports and dashboards.

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	yes
2	Meaningful variable and function names are used	yes
3	Code includes comments / documentation where necessary	yes
4	Error handling is implemented for critical operations	yes
5	The application runs without critical errors	yes
6	Code is committed to a version control repository	No

Additional Notes / Comments:

CRICKSTATS is a Salesforce-based Cricket Player Performance Tracking Application developed to manage player information and match-wise performance records. The system uses Salesforce Custom Objects, Relationships, Flows, Roll-up Summary Fields, Reports and Dashboards. Functional and performance testing was performed to verify record creation, validation, Flow execution, data consistency and performance calculations.
