Team ID	SWTID-2026-3226
Project Name	CRICKSTATS
Maximum Marks	5 Marks

Performance Testing

Performance testing evaluates how your system behaves under expected and peak load conditions. Complete the sections below to document your testing approach, tools used, and results obtained.

Step 1: Testing Overview

Field	Details
Testing Tool Used	Salesforce Lightning / Salesforce Performance Monitoring
Type of Testing	Performance Testing, Response Time Testing, Load Testing
Target Module / API	Player Object, Match Performance Object, Player Flow, Reports and Dashboards
Test Environment	Salesforce Cloud / Salesforce Lightning Application
Test Date	29-09-2026

Step 2: Test Scenarios

Your paragraph text

S.No	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	Player record creation and data entry	5	60	Player records should be created smoothly without significant delay
2	Match Performance record entry	5	60	Match performance data should be saved correctly with acceptable response time
3	Player Flow execution and team-based player filtering	5	60	The Flow should retrieve and display the required player records correctly
4	Reports and Dashboard loading	5	60	Reports and dashboards should load smoothly and display accurate performance data.

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time (Avg)	< 2 seconds	Within acceptable project usage	Pass	System responded within an acceptable time during normal usage.
2	Response Time (Max)	< 5 seconds	Within acceptable project usage	Pass	No significant delay was observed during testing.
3	Throughput (Req/sec)		Stable during testing	Pass	Requests were processed smoothly during testing.
4	Error Rate	< 1%	No critical errors observed	Pass	No critical errors were observed during the tested operations.
5	CPU Utilization	< 80%	Not specifically measured in the project document	Not Measured	Not specifically measured in the project document.
6	Memory Utilization	< 80%	Not specifically measured in the project document	Not Measured	Not specifically measured in the project document.

Step 4: Observations & Analysis

Key Findings:

The CRICKSTATS application performed correctly during testing. Player and Match Performance records were created successfully, validation rules were checked, flows executed correctly, and roll-up summary fields calculated player statistics accurately.

Bottlenecks Identified:

No major performance bottlenecks were observed during testing. The system showed stable performance during data entry, report generation, and dashboard loading without significant delays.

Optimization Steps Taken:

The system was optimized by using Salesforce Flow for automation, roll-up summary fields for automatic calculations, validation rules to reduce incorrect data, and reports and dashboards for efficient performance analysis.

Step 5: Screenshots / Evidence

Attach screenshotsofyourperformance testing tool results below (e.g., JMeter report, Locust graphs, k6 output):

The screenshot shows the SmartBridge Object Manager interface. The left sidebar lists various setup options, with 'Fields & Relationships' selected. The main area displays a table of fields and their relationships for 'Match Performance'.

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Cathes	Cathes_c	Number(2, 0)		
Created By	CreatedById	Lookup(User)		
Customer Account	Name	Text(80)		✓
Last Modified By	LastModifiedById	Lookup(User)		
Player	Player_c	Master-Detail(Player)		✓
Stumpings	Stumping_c	Number(2, 0)		
total runs	total_runs_c	Number(18, 0)		
Wickets Taken	Wickets_Taken_c	Number(2, 0)		

SCREENSHOT 1

The screenshot shows the CRICKSTATS website. The 'Players' menu is selected, and the profile of Virat Kohli is displayed. The 'Details' tab is active, showing various player attributes.

Related	Details
Player Name	Virat Kohli
player name	Virat Kohli
Player Number	18
Profile Picture	
Date of Birth	11/5/1988
Role	Batsman
Batting Style	Right- Handed
Owner	Taskeen Banu S
